Rubber stamps - 'Curls & Swirls', 'My Life' & 'Starburst Florals' from The Angel Company

Noir Palette ink

Acrylic block

Paper cutter

Scotch Tape

Step 1:

Score the right side of the 12" x 12" card stock at 1" and 11" on the Scor-Pal®

Step 2:

Crease folds and attach to the back side with Scor-Tape™.

Step 3:

Rotate the card stock 90 degrees, and on the right side, score at 2 1/2", 3 1/2", 8 1/2" and 9 1/2".

Step 4:

Turn the card stock over top to bottom and score between the previously scored lines, at 3 1/2" and 9 1/2".

Step 5:

Accordion fold on these three scored lines so the middle line is a mountain fold on the wrong side. Burnish with Scor-Tool.

Step 6:

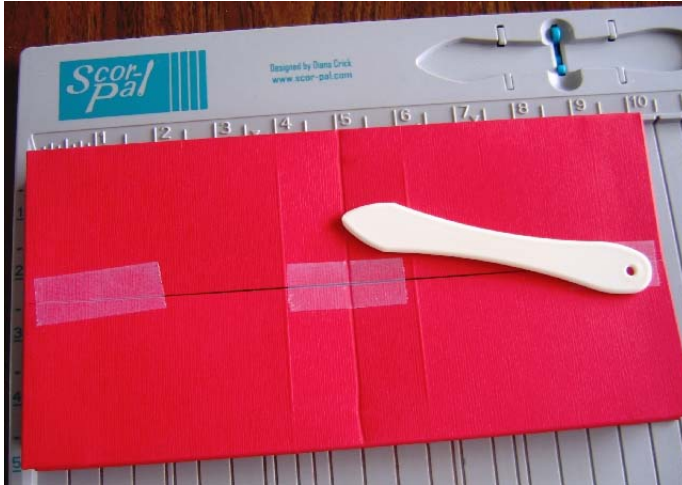

Bring the two edges together to create a flat tube. They will just meet in the center. Tape them together with Scotch tape. Be careful not to tape the tube to the back side, just together.

Step 7

Place the long side of the tube on the Scor-Pal® to the top and left fence. Score at 4" & 6". You will be going through two layers so press firmly. (Diana - At the edges you will be going through 4 layers and you will not be able to make much of a score mark. Do not worry too much about this area, score a line as best you can. Pay attention to the middle part. The fold will take care of itself. I used a heavy 80lb textured cardstock and although it worked I would recommend using a

smooth cardstock for your first try. My second textured one was perfect.)

Step 8

Turn the card stock, score between these two score lines at 5". Again pay attention to the middle part.
(Diana - At this point I found it easier to do the stamping I wanted on the front of my pouch. It was flat and I could get a good impression.)

Step 9

Accordion fold on these scored lines so the middle line is a mountain fold on the wrong side. Burnish first with fingers and then finally with Scor-Tool

Step 10

Decorate the front of the pouch as desired.

Step 11

Place a 2" piece of Scor-Tape™ on the inside center to hold it together but do not go all the way across. It will hold more cards this way (10 max with envelopes).

Step 12

Make and decorate the cards & envelopes you would like to have in your caddy.
