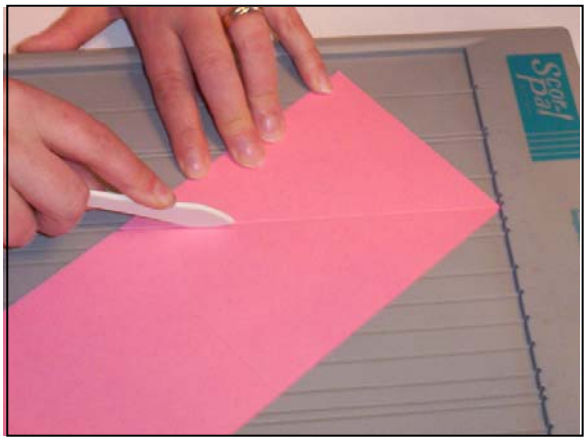
Double Diagonal Pocket Card

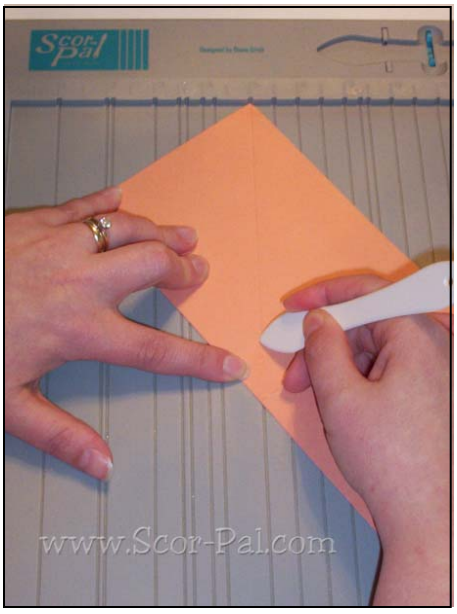
Cary Elred © *Copyright 2007*

Supplies:

Scor-Pal®
Personal Trimmer or scissors
Card Stock, two coordinating colors, 4 ¼" x 11"
Card Stock, 4 3/8" x 3 ¼"
Card Stock, 2 9/16" x 2 ¼"
Card Stock, neutral, two pieces, 4 3/ 16" x 3 1/8" and 2 3/8" x 2 1/8"
Scor-Tape™" ¼" (Red Line tape is shown in the picture)
Stamps and ink

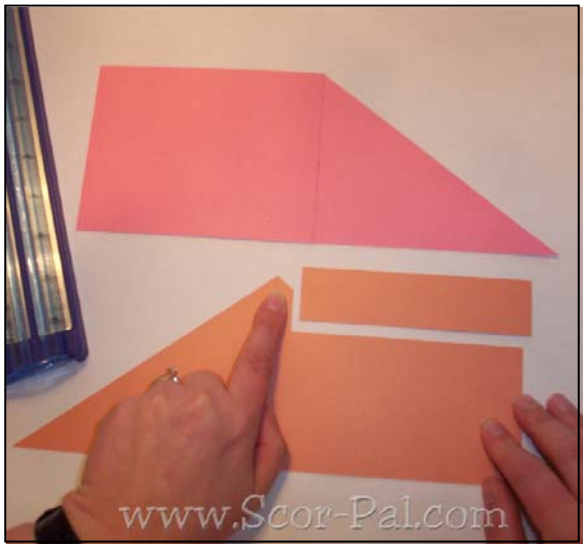
Step 1: Score each piece of 4 ¼" x 11" card stock at the 5 ½" mark.



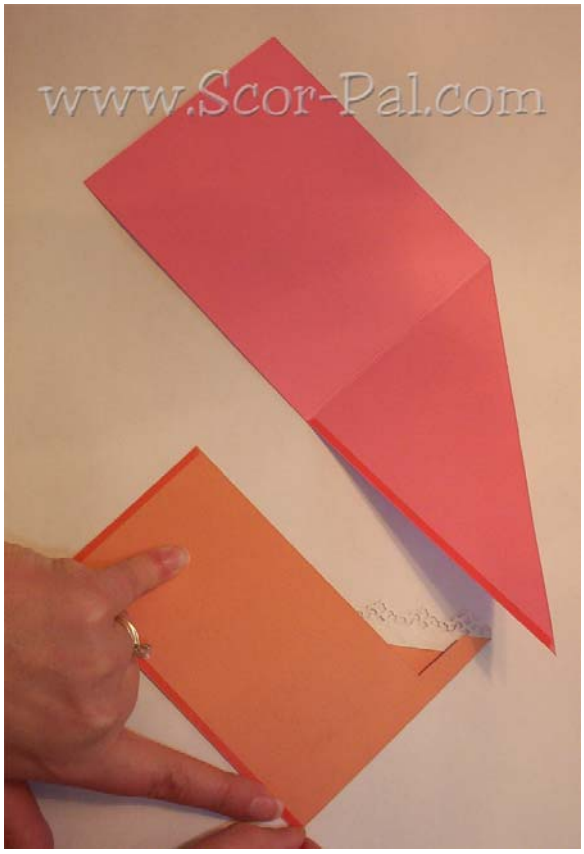


Step 2:
Score again on the diagonal from the
5 ½" score to the corner, being sure to
score each piece of card stock on opposite halves

Step 3: Trim off the upper diagonals on each piece of card stock.



Step 4: Cut off a 1 ¼ inch strip off of the back of the inside piece of card stock. Make a small diagonal cut on the flap. Cary's finger is pointing to the cut edge. Do not cut all the way across, leave a 1/4" flap. The flap makes for a better engineered card. It stays together better and leaves more room for the inserts to get maximum writing room.



Step 5: Stamp and embellish the scored card stock as desired. Stamp and embellish the neutral pieces of card stock and matte them to the coordinating pieces of card stock (4 3/8" x 3 ¼" and 2 9/16" x 2 ¼"). These are The pocket inserts.

Step 6: Place the Scor-Tape™" (red line shown in picture) along the side edges of the card backs and along the bottom edges of the diagonal flaps. Refer to picture.

Step 7: Adhere the card pieces together with the backs on top of each other making a double pocket card. Adhere the diagonal flaps over the top of the card creating the crossover pieces.

Step 8: Embellish the inserts as desired.

The finished card!
