

## “Pockets and more pockets”

Shelly Maxwell © All Rights Reserved 2008

### **Step 1:**

Trim your paper to 12” x 5 ½ “. Place **right** side of the paper on the Scor-Pal with the 12” edge along the top fence

### **Step 2:**

Score at 4 ¼”.

**Step 3:** Turn the paper over, top to bottom, **wrong** side is now showing. Score at 6 ½”, 10”, and 11”.

### **Step 4:**

Turn paper over to **right** side, Move the 6 ½ “ score to the left, ½”. It will line up with the 6” gutter. Score at the inverted triangle gutter (7 5/16”).

The reason we turn the paper over each time is so that we are always folding with the score line, indentation to the outside of the fold.

### **Step 5:**

Fold up the 10” and 11” panels back onto themselves twice. This forms a one inch wide border. Use a Crop-a-dile to place eyelets at either end to hold down the folds. This creates a thick bottom edge to the card front. (Refer to photo)

### **Step 6:**

Accordion fold the last two creases. Glue down the front flaps along the edges so it still open as a pocket. On the inside glue the sides of the inner fold thus forming another pocket. (It could hold a tea bag, secret note, embellishment or gift card). You now have one pocket on the card front and one pocket on the inside of the card.

### **Step 7:**

Lace ribbon through holes and tie ribbon in a bow on the front of the card. Cut a decorative paper strip about ½” wide from scraps and glue to the bottom edge of card or use ribbon. Tuck thin treats or additional paper embellishments into the pockets. (Refer to photo).

Diana: I added a kick Stand to the front of my card so it would stand up on its own. You can also change the orientation of the card by standing it up with a side fold.

**Step 6:** Accordion Fold, forms pocket .

**Step 5:** Folded band

Inside of card  
Another pocket
