

Tiny Takeout Box

Tutorial by Beate Johns© 2008 *All Rights Reserved*

Supplies:

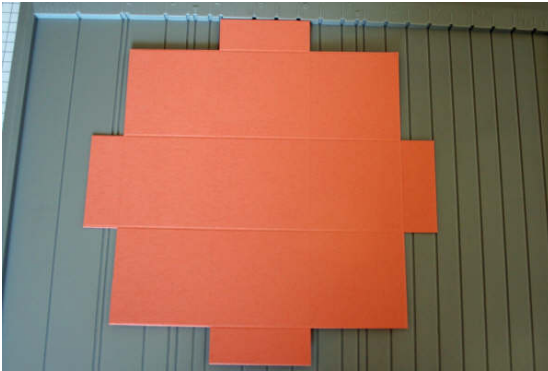

- One 8" square of cardstock
- Scor-Pal
- Crop-a-dile
- Ribbon
- Stamps
- Dimensionals or other adhesive

Step 1:

Score your cardstock at 1", 3", 5" and 7"

Step 2:

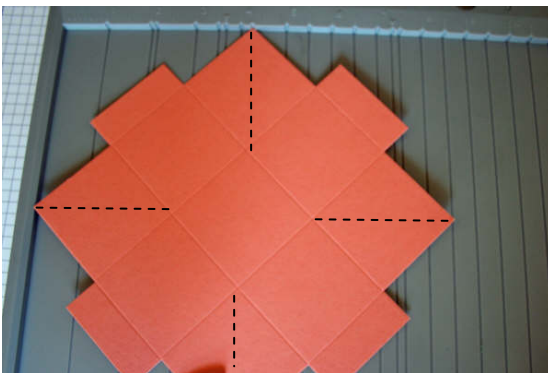

Turn cardstock 90 degrees and score again at 1", 3", 5" and 7"

Step 3:

Cut off outer panels except for the center one of each side. These will be your fold over flaps.

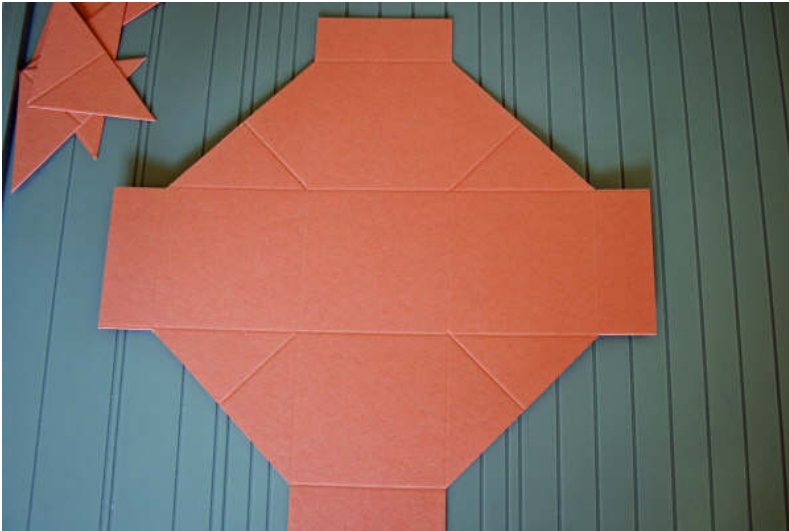

I cut my center panel down to $\frac{3}{4}$ " in height.

Step 4:

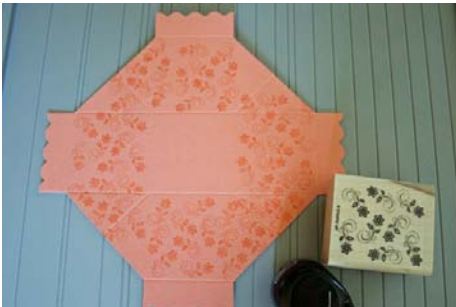

Line up one of your box corners with the $4\frac{1}{4}$ " mark. The corner to the left will touch the left side of your Scor-Pal®. Now score the top and bottom outer square diagonally.

Step 5: Turn cardstock 90 degrees and repeat step 4.

Step 6:

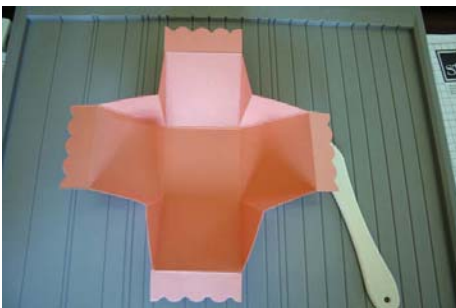

Cut from the low point of one flap, to the low point to the next flap. It will cut your outer squares in half, leaving only a scored triangle. Repeat on all four corners.

Step 7:

Stamp the sides of your boxes. It is okay if your stamping overlaps on the triangles. They will not be seen.

Add decorative edges to your flaps if desired.

Step 8:

Pre fold all your scores.

Step 9: Add a dimensional under your flap and fold over.

Step 10:

Fold up one side at a time and punch a hole with your Crop-a-Dile.

Step 10b (Inside view):

Punch through the flaps on the inside of the box. It will help keep the flaps on the side when ribbon is pulled through.

Step 11:

Tie ribbon through holes.

Step 12:

Decorate the box front and fill with goodies.
