

I was helped by the tutorial at [Marianne's Papir](#) but my card is a little larger and I have used the new [Scor-Envi tool](#) to make a coordinating envelope. I played around with the tool and it was pretty easy to make a custom sized envelope for this card.

Card Recipe:
Image - Pie Tilda
Medium - [Copic Markers](#)
Paper - Autumn Splendor by DCWV
Twill Ribbon - Hobby Lobby
Die Cuts - Heartfelt Creations
Epoxy Sentiments - K and Co
Tools - [Scor-Pal](#) and [Scor-Envi](#)
Corner and Border Punch - Martha Stewart Vintage Doily

Using a 6" by 12" piece of cardstock place at the top fence of the [Scor-Pal](#) and score at 3", 5", 7" and 9".

Burnish the fold to form two flaps that go back making a forward facing panel.

Die Cut the decorative panels for the sides and center.

Ink the edges of the die cuts and adhere to the panels.

For the envelope start with a 10" square of cardstock/designer paper. As per the instructions on the tool and the photo place the [Scor-Envi](#) tool in the top right hand corner of the [Scor-Pal](#) and place the cardstock against the tool as in the photo. Score at 3 1/4" and 8 3/4". Rotate the paper by 90° (1/4 turn) and score at 2 3/4" and 9 1/4".

Snip out the corner triangles that are formed and burnish all scores.

Using Scor-Tape adhere the back flaps and using a corner and border punch combination decorate the top (open) flap on the envelope.

See how perfectly it fits?
It took a few trial runs on some scratch paper but it only took a few minutes to work out the dimensions for a custom envelope.

It is a really nice fold and perfect for displaying your favorite image/

Here is a view from the side.

A final look at cute Pie Tilda. I hope you enjoyed this and I can't wait to see your creations using this super new addition to the Scor-Pal line.
